Program of **A C R S 2006**

The 27th Asian Conference on Remote Sensing

9-13 October 2006
Cultural Palace (opening ceremony)
Chinggis Khaan Hotel (technical sessions),
Ulaanbaatar, Mongolia

Organized by

Asian Association on Remote Sensing (AARS)

The Mongolian Society for
Photogrammetry and Remote Sensing (MSPRS)

Ministry of Education, Culture and Science (MECS)

Contents

Welcome Messages

Prof. Dr. Shunji Murai, General Secretary, AARS

Dr. Oe. Enkhtuvshin, Minister of Education, Culture and Science

Prof. D. Regdel, Secretary General of the Mongolian Academy of Sciences

Welcome Address (Shunji Murai, General Secretary, Asian Association on Remote Sensing)

Distinguished Delegates, Distinguished Guests, Distinguished Participants, Ladies and Gentlemen!

On behalf of Asian Association on Remote Sensing (AARS), I as General Secretary would like to welcome all of you to the 27th Asian Conference on Remote Sensing (ACRS) here in Ulaanbaatar, a beautiful and historical city of Mongolia. I am happy to know that this year is a special memorial year of the 800th anniversary of Chinggis Khan Empire.

It is my great pleasure to be able to organize the ACRS for the second time in Mongolia since 1992 in cooperation with the local organizing committee. I congratulate the Organizing Committee as well as Mongolian scientists to host this important event for Asian remote sensing scientists in spite of many difficulties including finance. Since the very beginning, Mongolia has been one of most positive participants at ACRS in the past. Particularly Dr. Saandar contributed to the past ACRSs as National Delegate to AARS for long years.

As you may know, the ACRS has kept a unique style as follows as compared with other International or Western conferences.

1. The ACRS is fully open to any nation and region.
2. Non-discrimination, which means any full participant must pay the registration fee.
3. Self fund participation.
4. Inexpensive registration fee of just 100 US $ including conference, parties, proceedings in CD ROM etc. I appreciate the organizing committee for the generous manner on behalf of participants.

5. Home made but not commercialized conference!

The ACRS has been sustained with the following philosophy.
1. Friendship First and Money After!
2. For Asian, by Asian and with Asian!
3. Asian style with Asian culture!

My task as General Secretary is to preach the philosophy to younger Asian scientists to achieve the sustainable ACRS for coming years. I am surprising myself how I could manage the ACRS for more than 25 years. The answer is clear. I have been supported by Asian friends who understand the philosophy. It pushed me up until now. I want to thank you for your support.

One of the most important outcomes of the ACRS is friendship as I mentioned before. Through this conference you may have more chance to exchange opinions and ideas with your new and old friends to promote the true growth of remote sensing in Asia. You may expand your human networks after the conference and keep good communication with your friends. This would be the real purpose of the spirit of Friendship First and Money After.

Finally I wish you to enjoy this conference and contribute yourself to improve the quality of the conference by presenting papers, discussing technical issues, making performance at welcome party, exchanging mail addresses etc., whatever you can do for the conference.

Again, I appreciate the Organizing Committee to have made a beautiful arrangement for the conference.

Thank you.

Conference Committee

Honorary Chairman

Dr. Oe. Enkhuvshin   the Minister, Ministry of Education, Culture and Science , Mongolia

Conference Chairman

Dr. M. Saandar   President, Mongolian Society for Photogrammetry and Remote Sensing , Mongolia

Vice Conference Chairman

 Dr. M. Ganzorig, Director, Institute of Informatics and Remote Sensing, Mongolian Academy of Sciences (MAS) , Mongolia

Steering Committee

Shunji Murai   General Secretary, AARS, Japan
Manu Omakupt   Deputy General Secretary, AARS, Thailand
D. Eegdel   General Secretary, MAS, Mongolia

Organizing Committee

A. Bayasgalan, Director, School of Geology, the Mongolian University of Science and Technology, Mongolia

Ts. Adyasuren, President, Environmental Education and Research Institute (Eco-Asia) ,Mongolia

S. Hudulmur, Director , Information Center, the Ministry of Environment and Nature , Mongolia

N. Battogtoh, President, Holistic Consulting Ltd , Mongolia

Technical Program Committee

D. Amarsaikhan, Head of Geoinformatics Department, Institute of Informatics and Remote Sensing, Mongolian Academy of Sciences, Mongolia

Financial Committee

S. Bayasmaa, Secretary . the Mongolian Society for Photogrammetry and Remote Sensing, Mongolia

International Advisory Committee

Prof. Bruce Forster, Australia
Prof. Tong Qingxi, China
Prof. A.J. Chen, China Taipei
Dr. Narpat Rathore, India
Prof. Haruhisa Shimoda, Japan

Mr. Nik Nasruddin Mahmood, Malaysia
Prof. Armin Gruen, Switzerland
Dr. Suvit Vibulsresth, Thailand
Prof. Ian Dowman, U.K.
Dr. Ngyuen Dinh Duong, Vietnam

Conference Information

The 27th Asian Conference on Remote Sensing
October 9 – 13, 2006

Asian Conference on Remote Sensing (ACRS) is an annual conference, which is held under the auspices of Asian Association on Remote Sensing. AARS was formed in 1981, and its principal activity is to hold the Asian Conference on Remote Sensing. The association also conducts other remote sensing activities consistent with its aims. ACRS is aimed to provide a forum for the scientists, engineers, researchers and users of remote sensing and geo-informatics technology in scientific and academic experience exchange.

The 27th ACRS will provide an opportunity for participants to meet and deliberate on advanced technology, to establish collaboration ties, and to foster friendship. The 27th ACRS is jointly organized by Asian Association on Remote Sensing (AARS), The Mongolian Society for Photogrammetry and Remote Sensing (MSPRS) and Ministry of Education, Culture and Science (MECS).

Registration

+ All participants are requested to register at lobby of the Chinggis Khaan Hotel, the details are shown in the map.
+ The registration will be started on October 8, 2006, Sunday (13:00 – 21:00) and during the conference time (8:00 – 16:00).
+Registration fee and Receipt

   Pre-payment must be made at cashier before registration.
   -- Participant who has already paid for the registration fee can get the Receipts at the secretariat desk.
   -- Participant who makes payment during the conference can get the Receipts the day after at the secretariat desk.
      (Preferably after break or lunch)
+ Lunch, banquet and Conference kit coupons are attached with your name Badge.
+ For your convenience, please register on October 8, 2006, Sunday

Registration Fee

Foreign Participants --- US$ 100
Local Participants ----- Tug. 20,000 ₮
The registration fee per person for all participants, including session Chairpersons and presenting authors. The fee includes :
+ Attendance to the Conferences
+ One CD-ROM Proceedings and conference souvenir
+ Participation in the Opening and Closing Ceremonies
+ Lunch and Coffee breaks
+ Participation in Welcome Party
+ Participation in the Exhibition

Ulaanbaatar Capital City

Ulaanbaatar today is a modern city of approximately 1 million residents. It reflects both as pasts of present day Mongolia society: nomadic culture and modern society.

Ulaanbaatar is located near the Bogd Khan Mountains (altitude 1,350 m), and is built on the banks of the Tuul River. In the days of the great Mongolian Empire, Kharakhorum, which is located to the west in the Orkhon Valley, served as the capital city of the country. However, in the 17th century Kharakhorum was abandoned as capital, and the government opted for an existence as a migratory tent city.

In 2006, Mongolia celebrates the 800th Anniversary of the Great Mongolia Empire, we look forward to you joining in the celebration. This new nomadic settlement was named Urga, and was in reality a large caravan of gers that moved from place to place. Eventually in 1778 it settled in its present location of Ulaanbaatar.

Registration (100 US dollars in cash)

 14:00-20:00 October 8, Sunday: Registration at Chinggis Khaan Hotel
 08:00-09:45 October 9, Monday, Registration at Cultural Palace
 13:30-17:30 October 9, Registration at Chinggis Khaan Hotel
 Registration Desk will be open on October 10 to 12 from 08:30 to 17:30

Day1: October 9, 2006 (Monday)

Opening Ceremony at Cultural Palace, Sukhbaatar Square

10:00-12:00, October 9, 2006 Monday

Opening Speech: His Excellency Dr. Oe. Enkhuvshin, the Minister, Ministry of Education, Culture and Science, Mongolia

Welcome Address: Emeritus Professor Shunji Murai, General Secretary, Asian Association on Remote Sensing (AARS)

Address: Emeritus Professor John Trinder, First Vice President, ISPRS

Address: Mr. Kaoru Mamiya, Vice President, Japan Aerospace Exploration Agency (JAXA)

Address: Professor D.Regdel, Secretary General, the Mongolian Academy of Sciences

11:00-12:00 Cultural Performance by Mongolian Children

12:00-13:30 Lunch at Restaurant 5F, Chinggis Khaan Hotel
(Lunch is provided to those registered participants)

Keynote Speech (25 min. presentation and 5 min. discussion)

13:30-15:00 Plenary Session At Chinggis Khaan Hotel

K-1: Prof. John van Genderen:
Honorary Professor, National University of Mongolia
"Geoinformation Developments in Mongolia: Needs, Trends and Role of Human Resources"

K-2 Prof. Yoshifumi Yasuoka: Institute of Industrial Science, University of Tokyo, Japan,
"How can remote sensing contribute to Global Warming Issue?"

K-3: Dr. S. Khudulmur, Director, National Information Center, Ministry of
     Nature and Environment , Mongolia
      " Applications of Remote Sensing in Mongolia"

15:00-15:30 Coffee/Tea Break (Exhibition will start during the break time)

Invited Papers (18 min. presentation and 2 min. discussion)
 15:30-17:30

K-4: Prof. Haruhisa Shimoda, Tokai University, Japan
      "ALOS Sensors and Contributions to Asia"

K-5: Prof. Guo Huadong, Chinese Academy of Sciences
      "Report on RICESAT Project"

K-6: Prof. A.J.Chen, National Central University, China Taipei
      "Prospect of FORMOSAT"

K-7: Prof. Chu Liangcai, Chinese Association of Remote Sensing Application
      "Applications of Remote Sensing in China"

K-8: Prof. A.P. Cracknell, University Technology Malaysia, UK
      " VIIRS, The Successor to the AVHRR"

K-9: Dr. Jack Scott, Australian Aerospace Consulting, Australia:
      "MetOp to NPOESS: A New Family of Earth Monitoring Satellite"

18:30-21:00 ***Welcome Party at Brauhouse, Seoul Street***

Day2: October 10, 2006 (Tuesday)

Technical Program at Chinggis Khaan Hotel

09:00- 10:30

Room 1: Session A-1: Agriculture

A-1: GIS Application to Spatial Distribution of Soil Salinity Potentials in Northeast Thailand
 Mongkolsawat. C, Thailand 006

A-2: Assessment Differences in Growth and Yield of Rice Crop betweenSatellite Data Simulated from Near Ground Hyperspectal Data
Chwen-Ming Yang, China Taipei 011

A-3: Biomass Estimation at Miyagi Prefecture in Northeast Japan using RS and GIS
Ryoko Iwasa, Japan 028

A-4: Predicting Tillage Practices and Agricultural Soil Disturbance in North Central Montana with Landsat Imagery
N. Battogtokh, Mongolia 005

A-5: Biological Soil Crusts internal Classification Using Groung –Level Spectra Temporally-based Image selection for detection of Biological Soil Srusts in Southern Australia
 Ardavan Ghorbani, Iran 001

Room 2: Session B-1: Geology

B-1: Application of Multi-sensor Image to Monitoring Mining Activities and Related Environment Changes: a Case study at Daye, Hubei
Yu Shiyong, China 016

B-2: Planning and Implementation of National Geo-scientific, Geo-Economic and Environmental Information Management System - an experience report
Andress Barth, Germany 003

B-3: Debris Flow Occurrence Factors with Rough Sets Theory
 H. C. Pai, China Taipei 067

B-4: Procedure for developing appropriate geoinformation data using GIS for mining affected areas in Mongolia
 R. Tsolmon, Mongolia 007

B-5: Rate if Sand Dune Movement and Aeolian Deposits Distribution with the aid of Geo-information Technology

Mushtaki T. Jabbar, China 008

Room 3: Session C-1: Urban

C-1: Progressive Streaming and Rendering of 3D Terrain for Cyber city Visualization
Hau-Shiung Liu, China Taipei 013

C-2: A study on an Efficient Making Method of Detialed Time-series Urban Dataset by Spatial Integration of Yellow-page Data and Digital maps for Urban Analysis
Yuki Akiyama, Japan 036

C-3: Integrating GPS, GPRS and Inmarsat for Improved Efficiency
Albert Cheung, China Taipei 008

C-4: Evaluation of Urbanization Process in Ulaanbaatar City using Multitemporal RS Images
D. Amarsaikhan, Mongolia 003

C-5: 3D Structure Line- based Building Roof Reconstruction
Chieh-Chung Cheng, China Taipei 022

Room 4: Session D-1: Oceanography/Meteorology

D-1: Retrieving Water Depth, Inherent Optical Properties and Bottom Reflectance from Hyperspectral Data by Spectrum Matching
Narvada Dewkurun, Singapore 004

D-2: Taipei Hot Spring Web Geographic Information System
Chia-Hui Shih, China Taipei 004

D-3: HY-1 Satellite and Applying its Data to Monitoring Red Tides
Lin Mingsen, China 007

D-4: Determination of the Cloud Threshold for MODIS Imagery over Taiwan Region
D. Gerelmaa, China Taipei 012

D-5: GIS for Coastal Zone Site Plan Scenario Development after Tsunami Disaster in Meulaboh West Aceh
W. Wardhana, Indonesia 003

10:30-11:00 Coffee/Tea Break

Room 1: Session A-2: Agriculture

A-6: An Investigation on Spectral Properties and Soil EC to Map Salt-affected Soils in Thailand
Rajendra P. Shrestha, Thailand 024

A-7: Rice Yield Estimation using Aero Digital Imagery
Tzu-yi Liao, China Taipei 042

A-8: Spatiotemporal Characterization of Mongolian Grassland Based on Vegetation Trend Analysis
Akira Hirano, Japan 002

A-9: GIS Application for Mulberry Rust Disease at Pophra District, Tak Province
Vicharn Amarakul, Thailand 016

A-10: Using Uncertain Element in the Multi- Spectral Imager Assessment
Chih-Hao Ou-Yang, China Taipei 064

Room 2: Session E-1 Disaster

E-1: Assessment of Tsunami Damage to Mangrove in South Eastern Coast and South Andaman Islands of India using Remote Sensing and GIS
Yousef Ali Hussein, The Netherlands 001

E-2: Risk Assessment of Forest Fire Vulnerability
Anusorn Rungsripanij, Thailand 001

E-3:Role and Importance Remote Sensing Data in Earthquakes Studies
Mohamad Rukieh, Syria 001

E-4: The Use of MODIS Active Fire Products for Strategic Fire Management
Meissner Bernd, Germany 001

E-15:Assessment of Flood Vulnerability and Mitigation planning in Munshiganj District, Bangladesh using Remote Sensing and GIS
Kulapramote Prathumchai, Thailand

Room 3: Session C-2: Urban

C-6: Building Modeling by the Integration of Multi-Source Data
Lien Chien Chen, China Taipei 031

C-7:Remote Sensing Based Land Cover Classification with Common Categories for Big Cities in East Asia: An Ampirical study using terra ASTER data
Fang Guan, Japan 005

C-8: Investigation of Land Use in Residential Areas of Ulaanbaatar City Using Very High Resolution Satellite Images
D. Aamasaikhan, Mongolia 002

C-9: Multi-scale Generalization of Three-dimensional Building Features in Urban Area
Cheng-Lien Fan, China Taipei 059

Room 4: Session D-2: Oceanography/Meteorology

D-6: The Dynamic Analysis of Coastal Land Use Patterns in Inner Lingdingyang, The Pearl River Estuary Xia Zhen. China 014

D-7: Spectral Reflectance of Clouds in Multiple- resolution Satellite Remote Sensing Images
 L. K. Kwoh, Singapore 003

D-8: Change Analysis of Waisanding Offshore Sandbar by LiDAR Dem Wei-Chen Hsu, China Taipei 056

D-9: Detection and Analysis of Post – Typhoon Three –Dimensional Changes in Haeundae Beach Topography using GPS and GIS Technology
Chul Uong Choi, Korea 001

D-10: Shoreline Detection and Changes of North Banggi Island, Sabah, Malaysia
Ejria Saleh, China Taipei 051

12:20-13:30 Lunch

13:30- 15:00 Poster Session P-1
(Please register at Poster Registration Desk in advance to get the place based on "First Come and First Choice")

P-1: Abstraction Information of Active and Concealed Faults by the Remote Sensing Technology
Aixia Dou, China 001

P-2: Extracting Urban Building Density and Floor area ratio Based on Extracting Urban Building Density and Floor area ratio Based on
Jin-ye Li, China 003

P-3: Spatial and Temporal Variation of Summer Corn
Li-Jing, China 005

P-4: The Decision-making Support System of Sustainable Development of Agriculture and Pasturing Industry in the Ecology-pasturing Economic Zone of Yanmengyuan of Shanxi Province Based on "3S" Technology

Wang Yimin, China 011

P-5: Study the Vanished Causation of Culture of Kuahu Bridge in North of Zhejiang Province with Remote Sensing Data

Wng Yongjiang, China 012

P-6: The Influence of Atmospheric Correction on Remote Sensed Parameters in   multi-temporal Evapotranspiration Monitoring

Wu Bing Fang, China 018

P-7: A Study on the Method to Retrieve land Surface Reflectance based on IRS P6 Data

Zhang Zhaoming, China 021

P-8: Quantitative Remote Sensing by the Combination of LiDAR , Sun Photometer and Earth Observation Images

Wei Gong, China 022

P-9: The SSMC Method for the Classification og High Spatial Resolution Remotely Sensed Images

Xin Huang, China 026

P-10: An Analysis of Coastal Topography and Land Cover Changes at Haeundae Beach, South Korea , by Merging GIS and Remote Sensing Data

Chul Uong Choi, Korea 001

P-11: Wildfire Fuel Mapping Using hyperspectral Remote Sensing Data

Yeosang Yoon, Korea 006

P-12: cancelled

P-13: Developing 3D Satellite Images Based Geographic Information System for Coast Disaster Area Management

Myung Hee Jo, Korea 008

P-14: Absorption band-depth analysis of hyperion dataset

M. Munguntuya, Mongolia 009

P-15: The Environmental Database Issue in Mongolia

M. Bayasgalan, Mongolia 010

P-16: Introduction of The Forest Renovation Activity by Fishermen in Nortneast Japan, using RS and GIS

Daisuke Kunii, Japan 003

P-17: Estimation of the Bamboo Aboveground Biomass Using Different Resolution Satellite Data

Fuping Zhang, Japan 004

P-18: Synergetic use of MODIS and ASTER/ Landsat TM/ETM Data for Land Cover Classification in Arid and Semi-arid Area of the Northern China

Hasi Bagan, Japan 007

P-19: A New Method for Individual Tree Detection Using Airborne LiDAR Pulse Data

Hitoshi Taguchi, Japan 010

P-20: Self-Information Project: A Study on Context -aware and Relationship Based on self-information

Jun Kumagai, Japan 012

P-21: Extraction of Nazca Lines by Satellite Data

Katsuya Takaku, Japan 013

P-22: 3D Images of the Remains of the ancient Mojos civilization from Digital Photographs

Kazuki Ishii, Japan 014

P-23: Field Detection of Non-Use Paddy Fields at Miyagi Prefecture in Japan Using Satellite and GIS Data

Kazumasa Osawa, Japan 015

P-24: Projecting Future Food Demand and Supply: Global Modelling for Land Use and Cover Change

Kenji Sugimoto, Japan 016

P-25: Identification for Relic Excavation of the Amazon Civilization from JERS-1/ SAR and ASTER images

Kohta Imai, Japan 017

P-26: Land use management for the prevention of losses outbreak in Ordos of Inner Mongolia

Takesi Yamamura, Japan 019

P-27: Diastrophism Evaluation of Niigata Chuetsu Earthquake by Aerial Photographs

Nana Mayuzumi, Japan 024

P-28: Storm Surge Disaster of Typhoon 9918 at New Moji District with a Distributed Runoff Model

Naoki Okada, Japan 025

Q-53: Automatic Building Height Extraction by Monoscopic Shadow Analysis

Ts. Javzandulam, Mongolia 015

Q-54: Hyperspectral target detection Algorithms

Sanaz Negahbani, ?

Q-55: Changes of NDVI associated with typhoon disturbance in subtropical forest ecosystems in central Taiwan

Meng-Fen Lee, China, Taipei 073

15:00- 15:30 Coffee/Tea Break

15:30- 17:30

Room 1: Session G-1: GIS

G-1: Mobile Wireless GIS with Near Real-Time Access to Satellite Imagery
A. V. Huynh: Singapore 006

G-2: Elevation Surface Interpolation of Point Data using Different Techniques a GIS Approach
Kulapramote Pratumchai, Thailand 004

G-3: The Query System of Eco-environment Remote Sensing Monitoring Theme for the Three Gorges Project based on WebGIS
Xinhui Ma: China 019

G-4: Platform of Visualization and Web-based Collaboration of Spatial Information
Satoshi Ueyama: Japan 030

Room 2: Session E-2: Disaster

E-5: Time Series Analysis for Drought Monitoring and Impact Assessment on Agricultural Area in Khon Kaen Province, Northeastern Thailand
Daroowan Kamthonkiat, Thailand 025

E-6: Compositing of MODIS Images for Burnt Area Detection in Southeast Asia
Jukka iimani Miettinnen: Singapore 001

E-7: A Bayesian Network for Landslide Susceptibility Map using Aerial Photo and DEM
Chi-Chung Lau: China Taipei 005

E-8: The Study of Flood Risk Assessment on the Mae Klong River by Integrated Hydraulic Model with Geographic Information System
Thudchai Sansena: Thailand 012

E-9: Combating Land Degration and Desertification in Drylands of India using Remote Sensing Technology and GIS

Room 3: Session A-3: Agriculture

A-11: The Construction of Land-use Data Map for Efficient Management of Large-scale Irrigated Farmlands in Uzbekistan
Takeo Amano: Japan 020

A-12: Mapping of Basic Capacity in Rice Production Saved from Chemical: A Case of Sustainable agriculture Network in Phichit Province, Thailand
Achariya Nate-Chei: Thailand 018

A-13: Analysis of Spatial Distribution of Paddy Field in the Northeast China Obtained by Using a Mapping Method Adapted to MODIS Data
Satoshi Uchida: Japan 042

A-14: Application of Boosting to Improve Image Classification Accuracy in Rice Parcel with Decision Tree
H. H. Chen: China Taipei 069

Room 4: Session F-1: Forest

F-1: Optical and Microwave Image Fusion to Detect and Monitor Illegal Logging and Tropical Rain Forest Encroachment in East Kalimantan, Indonesia
Yousef Ali Hussein: The Netherlands 001

F-2: Cancelled

F-3: Modelling Forest Canopy Using Airborne LiDAR Data
Jihn-Fa Jan: China Taipei 018

F-4: The Linear Mixture Model Applied to Landsat Data for Saxaul Mapping
B. Suvdantsetseg; Mongolia 006

F-14: Estimating timber volume in a commercial Eucalytus plantation from Landsat ETM+ imagery: Results from two aspects
Pranab J. Barauh, Japan

F-15: Net primary productivity estimation of Broadleaf forest by 3PG model comparing with MODIS iamge
Supanlika Potithep, Japan

18:30 - 21:30

General Conference (1) at Mongolian Restaurant (Taliin Mongol) located at Trade Street, near National Historical Museum, and opposite to the Head Office of Golomt Bank (only for National Delegates)

Day 3 : Oct.11, 2006 (Wednesday)

09:00- 10:30

Room 1: Session I-1: Data Processing

I-1: Automated Optimum Size Determination of Artificial Neural Network for an Efficient and Accurate Satellite Image Classification
Joel Bandibas: Japan 011

I-2: Line Extraction in Remote Sensing Image using Hough Transform Based on Granular Computing
Lianh Jing: Chian 004

I-3:Texture Analysis for Three Dimension Remote Sensing Data by 3D GLCM
Chun-Kai Chang: China Taipei 014

I-4: The Investigation Land Surface Feature using Optical and SAR Images
M. Ganzorig: Mongolia 004

I-5: Fractal Analysis for Hyper-spectrum in Remote Sensing
Yamato Yamaura: Japan 035

Room 2: Session E-3: Disaster

E-10: Application of Satellite Data and Geographic Information System for Drought Risk Analysis in Bandanlanhoi district, Sukhothai Province
Wipop Paengwungthong: Thailand 017

E-11: Evaluation of Landside Hazard Potentials in Shei-Pa National Park
Ying-Hsu Liu: China Taipei 065

E-12: ALOS Palsar and Radarsat Application on Flood Detection in the Lower North of Thailand
Kannika Komwong: Thailand 003

E-13: Disaster Management in India – Some Issue
Narpat Sinh Rathore: India 002

E-14: Research and Management of Coal Fire in China
Wu Chacha: China 013

Room 3: Session G-2: GIS

G-5: Using SSM/ I- derived Air-sea Parameters to Analyze the Formation Mechanisms of Equatorial Typhoon Vamei
Chia-Chi Liu; China Taipei 003

G-6: GIS and Socio- Economic Study of Kaew Noy Dam
Makasri Chaowagul: Thailand 005

G-7: A Method of Data Transformation for Satellite Images Metadata for Remote Sensing Images
Z. Y. Zeng: China 020

G-8: An Analysis for Tenants Change Using Digital Telephone Directory and Town Map in Tokyo Region
Takeshi Shibuki: Japan 033

Room 4: Session F-2: Forest

F-5: Shape-based Tree Crown Detection and Delineation in High Spatial Resolution Aerial Imagery
Min-Hsin chen: China Taipei 048

F-6: Long-term Monitoring for Vegetation at Mt. Sugihara
Hanae Sato: Japan 006

F-7: Watershed Characterization Based on Changes in Land Use and Forest Cover
Abigail Joy Ramos-Dumaup: Philippines 001

F-8: Forestland Classification and Zoning with Liwoshe Working Circle by Using Ecological Method
Yeong-kuan Chen: China Taipei 045

10:30-11:00 Coffee/Tea Break

11:00-12:30

Room 1: Session I-2: Data Processing

I-15: A new Feature Selection Method for EO-1/ Hyperion Image Classification - A case study of Subei region, China
Li Xianbin: China 006

I-6: Development of Linux-based Archived Data Processing System in JAXA/ EOC
Miyano Yoshikazu: Japan 039

I-7: A new Robust Data Compressor for LIDAR Data Compression Biswajeet Pradhan: Malaysia 001

I-8: Proposal of the Methods of Evaluating Similarities between Trajectories by Describing the Shapes of Them
Tomoyuki Suzuki: Japan 037

I-9: Transitive Fuzzy System with Fading Signals Application to Remote Sensing Systems
Asadov Hikmat: Azerbaijan 001

Room 2: Special Session: Presentation Techniques to be presented by White Elephants of ISPRS

S-1: Emeritus Prof. John Trinder, University of New South Wales, Australia: Project Proposal

S-2: Prof. Armin Gruen, ETH, Switzerland: Thesis Writing

S-3: Emeritus Prof. Shunji Murai: University of Tokyo: Oral Presentation

Room 3: Session G-3: GIS

G-9: Geo-Informatics and Space Technology for Education and Research in Naresuan University
Wiboon Wattanatorn: Thailand 015

G-10: Design and Implementation of an Integrated GIS Application for Transportation Network Modeling
Yong-Jin Joo; Korea 005

G-11: Experience of Russia and Kazakhstan on Remote Sensing for Decision Making Support
Ippolitov Vitaly Yu: Russia 004

G-12: Adapting the LMF Temporal Splining Procedures from Serial to MPI/ Linux Clusters
Yann Chemin; Bangaladesh 001

Room 4: Session F-3: Forest

F-9: Using SPOT Satellite Image to Monitor the Forest Dynamics at Landscape Level on Nanjen Mountain Ecological Reserve in Taiwan
Yuh-Lurng Chung: China Taipei 047

F-10: Biomass Estimation of Japanese Forest Using ASTER Data
Takahiko Sigihra: Japan 038

F-11: Habitat Suitability Evaluation for Asian Elephant (Elephants maximus in the Bardia National Park, Nepal)
Tej B. Thapa: Napal 001

F-12: Application of Remote Sensing and GIS for Sustainable Forest Management Capacity Building in Mongolia
Daniel: Germany 002

F-13: Monitoring Forest Landscape Using Photogrammetric Techniques and Landscape Models
Chih-Da Wu: China Taipei 010

12:30-13:30 Lunch

13:30- 15:00

   Poster Session P-2 (Please register at Poster Registration Desk in advance to get the place based on "First Come and First Choice")

P-29: Monitoring a Volcanic Plume at Miyake Island with Satellite Data
   Naoya Osawa, Japan 026
P-30: Monitoring Vegetation changes on Kasugayama Primeval Forest Area, using Multitemporal Landsat TM/ ETM+ satellite images
   Noriko Soyama, Japan 027
P-31: Runoff Change with Urbanization in Tama New Town Watershed and its Fractal Geometry
   Shun Yamakawa, Japan 029
P-32: Identification for the Undersea remains at Yonaguni Island with Satellite Data
   Tatsuma Jahana, Japan 032
P-33: Fire Risk Assessment for Tiger Preybase in Chilla Range and Vicinity Rajaji National Park, India Using Remote Sensing and GIS
   Yousif Ali Hussein, The Netherlands 001
P-34: Field Validation of Rapid Post - Disaster Damage Maps of the 27 May Indonesia Earthquake Site
   Norman Kerle, The Netherlands 002
P-35: A Management Strategy for Future of Remote Sensing and GIS Integration in Nigeria.
   Ediang O. A., Nigeria 001
P-36: Regional Ecological Monitoring of Ecosystems Condition on the Base of Big-Scale Cartography (on an example of bulgan somon, southern gobi aimag, Mongolia)
   E. A. Vostokova, Russia 001
P-37: Open Dragon Programmer's Toolkit: A Framework for Learning Geoinformatics Software Development
   Goldin, Thailand 002
P-38: GIS- based land Evaluation For Combining Economic Crops as a Model for Agricultural Landuse Planning
   Monghkolsawat C., Thailand 006
P-39: High Resolution Data Fusion: Increasing Image Quality for detection and Identification of Different Objects

Mehdiyev Magsud, Thailand 007

P-40: Site Suitability Analysis for Industrial Area in Haridwar and Its surroundings Using Remote Sensing and GIS
Patkorn Theopjorn, Thailand 008

P-41: An application of Direction Finding Antennas for Lightning Locating System
Raungyudh Raungsakul, Thailand 010

P-42: Using Remote Sensing and GIS Technology for Mapping the Tsunami Affected Areas in Southern Thailand
Suthep Chutiratanaphan, Thailand 011

P-43: NOAA-AVHRR and Terra/Aqua MODIS Data Receiving Systems in Asian Institute of Technology,
Vivarad Phonekeo, Thailand 013

P-44: Risk Management for Chemical Emergency System based on GIS and Decision Support System
W. Kanarkard, Thailand 014

P-45: Cancelled

P-46: Urban Sprawl and Landuse Change in Suvanabhumi Airport (New Bangkok International Airport-NBIA) Area, Bangkok, Thailand
Vajendra Sintop, Thailand 023

P-47: Classification of Old-Growth Structure Characteristics Using Photogrammetry and Remote Sensing
Chi-Chuan Cheng, China Taipei 006

P-48: Using a GIS Road Network to Improve GPS Positions.
Chun-Jung Hsu, China Taipei 007

P-49: Forestry Monitoring with MODIS-derived Vegetation Indexes in Taiwan
D. Gereimaa, China Taipei 012

P-50: Morphological Processing of Video for 3D Building Model Visualization
Fuan Tsai, China Taipei 015

P-51: Solving Photo Orientation by means of Control Entities
Nei-Hao Perng, China Taipei 019

P-52: Feature Extraction of LiDAR Point Cloud Sets and Accuracy Assessment
Shih-Huang Lin, China Taipei 021

P-53: Landslides Detection using Aerial Ortho-Image and LiDAR Data
Jiann-Yeou Rau, China Taipei 024

P-54: A Hierarchical Perspective towards the Management and Application of Metadata for Remote Sensing Images
Jung-Hong Hong, China Taipei 026

P-55: Single-Epoch Ambiguity Resolution for Airborne GPS Carrier-Phase
Observations
Kang-Wen Chu, China Taipei 027

Q-49: Automatic Geometric Correction
Hyunsuk Kim, Korea 011

Q-50: Effect of Atmospheric Correction for Land Cover Classification Using
Hyperspectral Data
Sun Hwa Kim, Korea 012

Q-51: Extracting Bare Ground Points Airborne LiDAR Data in Mountainous
Forested Area
Jong Suk Yoon, Korea 013

Q-52: Estimation of Land Surface Temperature Using NOAA-A VHRR
Thermal Infrared and Weather Station Data in the Mongolian Grassland
S. Tuya, Mongolia 013

15:00- 15:30 Coffee/Tea Break

15:30 - 17:30

Room 1: Session H-1: Mapping

H-1: Dense Digital Surface Model and TrueOrtho image allow Supporting
Versatile and Innovative Application
Myriam Chikhi: France 003

H-2: Extracting the Characteristic Information of Coast Environment Using
high resolution Satellite Images in West Sea Garolim Bay
Myung Hee Jo: Korea 008

H-3: A Comparison of Neural Network and Maximum likelihood for Landuse/
Landcover Mapping in Khon Kaen Province, Thailand
Suwanwerakamtorn R. Thailand 021

H-4: Application of ALOS PALSAR Data for Efficient Land Cover Mapping
D. Amarsaikhan: Mongolia 001

H-5: A study for Rapid Phase Ambiguity Resolution on Precise Kinematic
GPS Positioning
Chi-Hsiu Hsieh: China Taipei 025

Room 2: Student Session/Education (invited Speech)

SS-1: Student Consortium of ISPRS; Representatives from Asia

SS-2: Prof. Kohei Cho, Tokai University, Japan: Role of E-Learnig

SS-3: Mr. Sjaak Beeren, ITC, The Netherlands: Capacity Building in Developing Countries

SS-4: Dr. Nguyen Dinh Duong, Institute of Geography, Vietnam: Free Software Development on Remote Sensing and GIS for Education

SS-5: Prof. Tuan-Chih Chen, China Institute Technology, China Taipei: ISPRS on Internet-Education, E-Learning and Distance Education

Room 3: Session I-3 Data Processing

I-10: The Research of Knowledge Expression on Image Classification by using Rough Sets Theory and PCA
  I. L. Shih: China Taipei 071

I-11: An Error Correcetion Method for NOAA Image
  An Ngoc Van: Japan 043

I-12: Automatic Bridges Extraction from Multi-sources Satellite Imagery Using Fusional Level set Model
  Yun Yang: China 017

I-13: A Neural Network Method of Selective Endmember for Pixel Unmixing
  Wu Ke: China 025

I-14: Orienting FORMOSAT -2 Imagery by Control Entities
  Yi-Chien Lin: China Taipei 020

Room 4: Session J-1: SAR

J-1:Classification of Polarimetris SAR Data Using an Alpha-Entropy
  David Bruce: Australia 002

J-2: Assessment of Single Date ENVISAT Alternating Polarization ASAR Data for Rice Mapping
  Tan Bingxiang: China 010

J-3:Initial-period Data Analysis of PALSAR
  Tomonori Deguchi: Japan 034

J-4:On Detecting Edges in Polarimetric Synthetic Aperture Radar Imagery
  Ken Yoong Lee: Singapore 002

J-5:Polarization Signatures of Microwave Emission from Dry Snow
  Alexandar A. Chukhlantsev: Russia 003

Day 4 : Oct.12, 2006 (Thursday)

09:00 - 10:30

Room 1: Session T-1: Environment/Ecosystem

T-1: The ecosystem research of Yingtai in Jilin Oil Field Based on Remote Sensing Data
Shen Jinli: China 009

T-2: Analysis of the Geographical Process of Land Degrations in Plateau Region with Time-series Satellite Images
Hiroyuki Miyazaki: Japan 008

T-3: Dust and Sand Storm Monitoring of Mongolia
L. Ochirkhuyag: Mongolia 008

T-4: The Heat Island Patterns over the western Taiwan Plain with MODIS and Airborne IR Imager Data
T. H. Kuo: China Taipei 039

T-5: Application of Remote Sensing Quantitative Retrievals in the High Performance Geo-Computational Environment
Ying Luo: China 015

Room 2: Session H-2: Mapping

H-6: A test on the Determination of GCP and ICP for 1-m High Resolution Satellite Image
Su-Young Park: Korea 003

H-7: A Study of Cadastral Coordinate Transformation Using Artificial Neural Network
Lao-Sheng Lin: China Taipei 030

H-8: Applying DEM to Analyze Topographic Attributes on the Spatial Distribution of Vegetation
Li-Hsin Hsieh: China Taipei 052

H-9: Remote Sensing and GIS Application for Water Reservoirs Conservation
Jin-Jia Syu: China Taipei 070

H-10: Fusion of Shape and Spectral Features for the Classification of High Spatial Resolution Remotely Sensed imagery
Xin Huang: China 026

Room 3: Session J-2: SAR

J-6: Coherent Target Analysis for Detecting Long-Term Subsidence in Shanghai
  Deren Li: China 023

J-7: Rainfed Rice Area Mapping and Backscatter Analysis Using Multi-temporal RADARSAT-1 Images in Pangasinan and Nueva Ecija Provinces of Philippines.
  Mehdiyec Magsud: Thailand 007

J-8: Construction of A Mobile Platform for Microwave Remote Sensing Scatterometer System
  Halim Aziz: Malaysia 002

J-9: Monitoring of Bar Transformation in the Han River Estuary Using RADARSAT/ SAR Images
  Chan-Su Yang: Korea 009

J-10: Analysis on temporal changes of soil moisture with SAR iamges for agricultural drough monitoring in north-eastern part of Thailand
  Junichi Susaki, Japan

Room 4:   Workshop W1: Title to be announced
        Coordinator: Dr. Lal Samarakoon, Geoinformatics Center, AIT

10:30-11:00 Coffee/Tea Break

11:00 - 12:30

Room 1: Session L-1: Land Use/Land Cover
L-1: Classification Smoothing in Land Cover Mapping Using MODIS Data
  Ngyuen Dinh Duong: Vietnam 001

L-2: The Study of using multi-scale spatial data in landslide monitoring and landuse classification interpretation
  Yeh Mei Lin: China Taipei 062

L-3: Local Specific Characteristics of Land Use in Regions of Sudan Gezira Irrigation Scheme
  Kiyoshi Torii: Japan 018

L-4: Platform for Visualization and Web-based Collaboration of Spatial Information
  Shigeo Ogawa: Japan 030

L-5: A Study on Cadastral Coordinate Transformation Using Artificial Neural Network

Liu Jin-King: China Taipei 033

Room 2: Session M-1: Photogrammetry/Lidar

M-1: Digital OrthoPhoto Camera System
    Cheng Xiangning: China 002
M-2: Objects Tracking and Positioning Using Multiple Active Video Cameras
    Bing-Cyuan Lai: China Taipei 001
M-3: Automatic Reconstruction of 3D Road Models by Using 2D Road Maps and Airborne LiDAR Data
    Chao-Yuan Lo: China Taipei 002
M-4: Using a Tree Dimensional Spatial Database to Orthorectify Automatically Remote Sensing Images
    Myriam Chikhi: France 002
M-5: Planar Feature Extraction from LIDAR Data Based on Tensor Analysis
    Chung-Cheng Lin: China Taipei 009

Room 3: Session T-2: Environment/Ecosystem

T-6: The construction of spatial integrated data map for control the crop losses damaged by wild beasts
    Kiyoyuki Yaota: Japan 021
T-7: Predicting Invasive Species Distributions at the Large-scale Using GIS and Remote Sensing
    Hao Chen: China 024
T-8: Current Status of GOSAT Ground System Design and the Role of NIES
    Hiroshi Watanabe: Japan 041
T-9: A Study of Developing GIS-based Water Quality Management System of rural area
    Tao Song: Korea 004
T-10: The Network of Model Polygon for Long-Term Monitoring Ecosystems of Mongolia
    M.Saandar: Russia 002

Room 4: Workshop W2: "Thematic Processing modeling and Analysis of Remotely Sensed Data"
    Organized by ISPRS Technical Commission VII
    Coordinator: Prof. John van Genderen

12:30-13:30 Lunch

13:30-15:00

Poster Session P-3(Please register at Poster Registration Desk in advance to get the place based on "First Come and First Choice")

P-56: Application on Terrestrial Laser Scanner and Plotless Sampling Techniques on Estimating the Total Basal Area of Forest Stands
Knag-Sheng Yeh, China Taipei 028

P-57: Terrain Change Detection Combined Photogrammetric DEM and Airborne LiDAR Data
Kuo-Hsin Hsiao, China Taipei 029

P-58: Using Segmentation Techniques and Fractal Theory to Extract Cloud Coverage for Fromosat-2 Quick-Look Images
Li-Yu Chang, China Taipei 032

P-59: Estimating Tree Height and Locations Using Airborne Lidar in Old Tree Area
Ta-Ko Chen, China Taipei 038

P-60: Horizontal Accuracy Evaluation of the Point Clouds from Airborne Lidar, An Experiment with Two Datasets of Hsin-Chu Area
Tian-Yuan Shih, Chian Taipei 040

P-61: Applying SSM/I data in Estimating the Typhoon Precipitation via a Rotational TRaP Method
Yen-Chih Chen, China Taipei 043

P-62: Derivation and Analysis of annual LAI from MODIS
Yin-Ju Chen, Chian Taipei 044

P-63: Monitoring of Illegal Dumping Using Spatial Data Mining and Remote Sensing
Ching-Yueh Chang, China Taipei 049

P-64: Multi-Temporal Satellite Image Classification Using Spectral Class Database
Chi-Farm Chen, China Taipei 050

P-65: Forest Cover-type Classification Using SPOT4 and SPOT5 Images
Su-Fen Wang, Chian Taipei 053

P-66: Semi-Automatic Extraction of 3D Building Roofs from Airborne LiDAR Data
Shih-Hong Chio, China Taipei 054

P-67: A Split and Merge Tehcniques for Building Shaping
Tee-Ann Teo, China Taipei 055

P-68: Establish A 3D Model Using Laser Scanner at A Fixed Station

Wei-Kai Fang, China Taipei 057

P-69: Ground Based LiDAR Systematic Error Analysis and Calibration
Yi-Hsing Tseng, China Taipei 058

P-70: Evaluation for the Velocity of Debris Flow through Image Processing Techniques
Hsiu-Yi Ko, China Taipei 061

P-71: The Research of Checking Paddy Field Thematic map by Using Dempster-Shafer Theory
Y. R. Wang, China Taipei 063

P-72: Automatic Cloud Cover Information for Multi-Spectral Imager Assessment
Chih-Heng Liu, China Taipei 066

P-73: Urban Expansion Simulation Based on Cellular automat - A Case Study on Nantun Region
Yao-Chih Hu, China Taipei 068

P-74: Estimating Vehicular Pollution Effects in Coimbatore using GIS Environment
K. Shanthi Viswanathan, India 003

P-75: Location Based Service in Geomatics
Tanvee Gupta, India 004

P-76: Application of GIS and Remote Sensing in the Analysis of the Environment of the Bay of Bengal Using Some Oceanic Parameter
Balkrishna Patidar, India 005

P-77: Relationship of Temperature and Vegetation Changes in Urban Area with Multitemporal Satellite Data
Ketut Wikantike, Indonesia 001

P-79: The Use of Remote Sensing and GIS Data to Enhanced the Information on Decision Processes for Defining the Typology of Forest Management Unit in Tropical Forest Certification Decision Process
W. Wardhana, Indonesia 002

P-80: A GIS, GPS, Database Internet GIS Software
Mohamad Elsayed Eishayel, Egypt 001

P-81: Maged Marghany, Malaysia 004

P-82: Dean F. Hood, France 001

P-83: Development of GT Simulator for Learning Spectra Measurement.
Atsushi Komaki, Kohei Cho , Kazuyuki Tomoshige, Haruhisa Shimoda, Japan

Q-45: The Point-Source Pollution Management based on GIS and DSS
Prof. Wiroj Taweepworadej , Thailand 038

Q-46: Variational Method of speckle Reduction and Boundary Detection in SAR Imagery

Shen Chaomin, China 030

Q-47: Optimized Visibility by the Level Set Method

Shen Chaomin, China 030

Q-48: 3D Road Shape Production Techniques by Fusion of Laser Data and CCD Image

Sooahm Rhee, Korea 010

15:00-15:30 Coffee/Tea Break

15:30 - 17:30

Room 1: Session M-2: Photogrammetry/Lidar

M-6: Development of Orientation and DEM/Orthoimage Generation Program for ALOS PRISM

Izumi Kamiya: Japan 040

M-7: The Generation of True Orthoimages Using DEM, 3D Road models and Multi-View Aerial Images

Shin-Hui Li: China Taipei 037

M-8: Characteristics of Intensity Signal from Airborne LiDAR Data

Jung Il Shin: Korea 002

M-9: Automatic Registration of Ground-based LiDAR Data Sets by Using 3D

Tzu-Yi Chunag: China Taipei 023

M-10: A Wavelet Approach for Determining Surface Covered with AirborneLiDAR Points

Jaan-Rong Tsay: China Taipei 017

Room 2: Session N-1 Hydrology/Water

N-1: Remote Sensing and GIS Application for Water Reservoirs Conservation

Liu Yi-Hsuan: China Taipei 070

N-2: Ecosystem evaluation around Watarase retarding base - A Case Study of Subei Region, China

Hiroyuki Kobayashi: Japan 010

N-3: Soil Moisture Estimation Mongolia using ALOS PALSAR Data Motoyuki Sato: Japan 023

N-4: Matrix Overlay for Drought Assessment in the Nam Choen Watershed NE, Thailand

Suwanwerakamtorn R. : Thailand 020

N-5: Ground Based All Sky Imager to Study Large-scale Wave Feature
   P. K. Rajesh: China Taipei 036

Room 3: Session O-1 Satellite System

O-1: Digital Asia Data Sharing in Asian Region
   Pornthip Limiahapun: Thailand 009

O-2: Topo Map Generation by ASTER data and its Accuracy Evaluation
   Hiroshi Watanabe: Japan 041

O-3: Retrieval and Utilization of Online Available Satellite Imagery
   T. Bretschneider: Singapore 005

O-4: RazakSAT Images Receiving and Processing Station
   Shamasul Azman Samsuddhin: Malaysia 003

O-5: Improve performance of Aqua MODIS band 6
   Preesan Rakwatin, Japan

Room 4: Workshop W3 "Improvements in referencing geospatial data: Latest status "   Organized by MSPRS, Mongolia and NGA, USA
Coordinator: Dr. M. Saandar and Steve Kenyon

18:30 - 21:30

General Conference (2) at Ulaanbaatar Hotel, 6F Room 606/607 (only for National Delegates)

Day 5 : Oct.13, 2006 (Friday)

09:00- 10:30 Plenary Session: Demonstration of Virtual Reality, New Satellite Imagery, 3D Modeling etc.

(a) Landscape modeling
(b) 3D city modeling
(c) Cultural Heritage modeling

9:00-10:30 Poster Session P4:

Q-1: An Application of Direction Finding Antennas for Lightning Locating System
Raungyudh Raungsakul, Thailand

Q-2: Application of Remote Sensing and GIS in Landslide Detection
Yung-An Yang: China Taipei

Q-3: Wavelet Networks for Hyperspectral Images Classification
Hsiu-Han Yang: China Taipei

Q-4: Building Extraction from LiDAR Data Using Wavelet Analysis
Cheng-Kai Wang, Pai-Hui Hsu, China Taipei

Q-5: Comparison of Projection Pursuit and Matching Pursuit in Feature Extraction of Hyperspectral Images
Pai-Hui Hsu: China Taipei

Q-6: Impact of Atmospheric Water Vapor Content on Land Surface Temperature Retrieving from NOAA/AVHRR Data
Shin Akatsuka: Japan

Q-7: A study on estimation of bio-physical parameters of individual tree stands derived from LIDAR data and digital matrix camera image
Tatsuya Nawamura: Japan

Q-8: The Use of MODIS Active Fire Products for Strategic Fire Management
Yusuke Kobayashi: Japan

Q-9: Temporally-based Image selection for detection of Biological Soil Srusts in Southern Australia
Ardavan Ghorbani: Australia

Q-10: Damage Estimate of Waterworks Networks in the Earthquake
Miyuki Umezawa: Japan

Q-11: Use of GIS and Database Technologies for Knowledge Based Prediction of Geological Phenomena by Stochastic Method

M. Sieste: Germany

Q-12: A Management Strategy for Future of Remote Sensing and GIS Integration in Nigeria
Ediang O. A: Nigeria

Q-13: Prediction of the Summer Convection with MODIS and NOAA Satellite Data
Gin-Rong Liu: China-Taipei

Q-14: Using SPOT Satellite Image to Monitor River Water Quality Pollution Index
Po Jen Lin: China-Taipei

Q-15: Analyzing Spatial Pattern of Drought in the Northeast of Thailand using Multi- temporal of the Standardized Precipitation Index(SPI)
N.Wattanakij, W.Thavorntam and C.Mongkolsawat, Thailand

Q-16: Development of MODIS Fire Information System for Forest Fire Monitoring in southeast Asia
Vivarad Phonekeo, Thailand

Q-17: **Analysis of the Spatial Continuity Vegetation-covered Areas on a Regional Scale**
Kiichiro Kumagai, Japan 061

Q-18: **A time series evaluation of ASTER surface emissivity products**
Takashi Shinoda, Hideyuki Tonooka, Japan 062

Q-19: **A study on impact of band-to-band misregistration on ASTER TIR products**
Tomoharu Muneta, Japan 063

Q-20: **Bridge Monitoring System Using Close Range Digital Photogrammetry and Web GIS**
Jong Hyeok Jeong, Japan 064

Q-21: **A Comparative study on classification techniques to extract urbanization area using satellite images**
Ayako Tanaka, Japan 044

Q-22: **A study on distribution tendencies of commercial clusters in urban area by detailed time-series urban dataset**
Tatsuro Osada, Japan 045

Q-23: **A Method of Human Extraction in Crowded Scenes by using Multiple Laser Range Scanners and CCD Camera**
Hiroki Takahashi, Japan 046

Q-24: **Crowds Flow Detection and Monitoring of Indoor Temperature Distribution for Advanced Air Conditioning Control**
Kyoichiro Kataira, Japan 047

Q-38: **Metadata Implementation for Thailand Spatial Data Infrastructure**
Thitawadee Suvachananonda, Chaowalit Silapathong, Anusorn Kunarsa, Thailand 031

Q-39: **Comparison of NDVI from Multi-dates SPOT and LANDSAT for Forest Monitoring**
Amornchai Prakobya, Supapis Pol – ngam, Thailand 032

Q-40: **Mangrove Changes after Tsunami in Thailand**
Yootthapoom Potiracha, Thanwarat Anan, Kampanat Deeudomchan, Thailand 033

Q-41: **Application of RS/ GIS for Monitoring Typhoon and Storm in Thailand**
Ms.Siriluk Prukpitikul, Ms. Varatip Buakaew, Mr. Watchara Kasdach, Thailand 034

Q-42: **Application of Remote Sensing and Geographical Information System (GIS) for Coastal Zone Management off Cochin Coastal Region, India**
Wimon Pathtong, Thailand 035

Q-43: **Study of Urban Evolution and Settlement Patterns of Pak Kret Municipality, Changwat Nonthaburi by Using Satellite Data**
Chanika Sukawattanavijit, Thailand 036

Q-44: **Leaf Area Index Estimation by Using Remote Sensing Technique in Khao Phra Wihan National Park**
Apinan Kantirach, Thailand 037

Q-45: Underwater and Airborne Remote Sensing of Corals
Cho-Teng Liu, Yuan-Jie Chyou, Yong-Ching Fu and Chang-Wei Lee, China Taipei

10:30- 11:00 Coffee/Tea Break

 11:00- 12:00 Closing Ceremony

 Chaired by Mr. Manu Omakupt, Deputy General Secretary, AARS

 Summary of the 27th ACRS:Dr. M. Saandar, Conference Chairman

 JSPRS Award for Best Presentations and Best Posters
 (to be presented by Prof. Shunji Murai. President, JSPRS)
 Vote of Thanks
 Closing Remarks

Welcome for the 28th ACRS in 2007 to be held in Kuala Lumpur, Malaysia

Pre-conference Tutorials:

On the occasion of the 27th Asian Conference on Remote Sensing (ACRS) to be held in Ulaanbaatar, Mongol, 9-13th October, 2006, the following ACRS Pre-conference Tutorials will be organized at the Mongolian University of Science and Technology (MUST), Ulaanbaatar, Mongolia between the 6th and 8th and on 11th October, 2006, jointly by the Asian Association on Remote Sensing (AARS), ISPRS Commission VI Special Interest Group on Technology Transfer Caravan, ISPRS Student Consortium, Asian Institute of Technology (AIT), Japan Aerospace Exploration Agency (JAXA), and local students. The Tutorials are associated with the Student Summer School organized by the ISPRS Student Consortium.

The Tutorials are open to Mongolian scientists/students as well as participants of the 27th ACRS. Those who intend to participate in the Tutorials are requested to register by e-mail to: cho@yoyogi.u-tokai.ac.jp (Prof. Kohei Cho). The registration is free of charge.

Dr. Bayasgalan Amgalan, Director, School of Geology, Mongolian University of Science nad Technology (MUST) kindly assists the tutorial as the host.

His e-mail address is: bayas@must.edu.mn

Tutorials

Tutorial 1: Multi-spectral Classification with ALOS AVNIR2 / Terra ASTER Data

Lecturer: Dr. Ngyuen Dinh Duong, Institute of Geography, Vietnam
Maximum Number: 30 persons
Venue: Mongolian University of Science and Technology (MUST)
Date: 6th-8th October, 2006
Requirements: For Mongolian participants PCs are provided. Foreign participants are requested to bring their own PCs.
Softawre: WinASEAN (provided by Dr. Duong)
Data: ALOS AVINIR Data near Ulaanbaatar which will be provided by JAXA

Program:
6th October: Friday
 9:00-9:15   Opening

9:15-11:00   Introduction of ALOS Program: Prof. Haruhisa Shimoda (Tokai
            University, Japan)

11:00-12:00   Introduction of WinASEAN: Dr. Nguyen Dinh Duong (EISA, IG,
            Vietnam)

12:00-13:30   Lunch

13;30-17:00   Hands on Training; Multi-spectral Analysis with ALOS AVNIR2 / Terra
            ASTER Data: Dr. Nguyen Dinh Duong
                (Software and data are provided to each participant free of charge)

7th October: Saturday

9:00-16:30   Field Trip to Grass Land for Selection of Control Points for Satellite
            Image
                Processing by GPS and Ground Truth for Land Cover Classification

Remark: Any person who does not join the tutorials may participate in only the field
        trip. But the registration must be made in advance by e-mail to Prof. Kohei
        Cho (cho@yoyogi.u-tokai.ac.jp).

8th October: Sunday

9:00-12:00   Hands on Training (continued); Multi-spectral Analysis with ALOS
            AVINIR2 / Terra ASTER Data: Dr. Nguyen Dinh Duong

12:00-13:30   Lunch

13:30-16:30   Assessment of Multi-spectral Classification

16:30-17:00   Closing

Tutorial 2: 3D Mapping with High Resolution Satellite Imagery (ALOS-PRISM)

Lecturer: Prof. Armin Gruen, ETH, Switzerland

Maximum Number: 75 persons

Venue: Mongolian University of Science and Technology (MUST)

Date: 8th October, 2006

Program:

8th October: Sunday

9:00-9:10   Opening

9:10-12:00   Class Room Lecture with Computer Demonstrations: 3D Mapping with
            ALOS PRISM Triplet Data: Prof. Armin Gruen (ETH Zurich,
            Switzerland)

12:00-13:30   Lunch

Tutorial 3: Web GIS Mapping

Coordinator: Dr. Lal Samarakoon, Geoinformatics Center, AIT, Thailand
                  (lal@ait.ac.th)
Local Coordinator: Dr. Tsolmon Renchin (tsolmon@num.edu.mn)
Maximum Number: 25 persons
Venue: NUM-ITC-UNESCO Remote Sensing/GIS Laboratory, National University of
       Mongolia
Date: 8th October, 2006

 9:00-9:15   Opening
 9:15-12:00   Hands on Training: Open Source Web GIS Mapping:
 12:00-13:30 Lunch
 13:30-16:30 Continued
 16:30-17:00 Closing
